1. DOCUMENT HISTORY

Issue No	Document	Date of Issue
1	Excel Format document	Mar 2015
2	Document converted to Word and rationalised	Feb 2018
3	Complete re-format and rationalisation	Jul 2109
4	Removal of more than 10% of components	Jul 20

Revision No	ISSUE 3 - Revision Details	Date of Issue
0	Complete re – issue	19/7/19
1	Change of AM; addition of components	Feb 20
2	Amendment of line 25 to ‘series’	Mar 20

Revision No	ISSUE 4 - Revision Details	Date of Issue
0	Complete re-issue, removal of all pax seat part numbers, removal of all large interior components and class dividers	20 Jul 20
1	Addition of line 485 Main aircraft batteries Concorde RG-380E/44	29 Jul 20

Revision No	ISSUE 5 - Revision Details	Date of Issue
0	Complete re-issue, removal of lined through part numbers, MOE Appendix B – Capability List Table B1 – Table 1 updated, addition of lines 172-183 Main/ Emergency aircraft batteries Nickel-cadmium/ Lead P/N. Air Liquide C rating amended to C15. Change Quality Manager to Compliance Monitoring Manager	25 Aug 20
1	Change Accountable Manager to Karen Greene	29 Sep 20
2	Addition of lines 184 - 215 Main & Emergency aircraft batteries Nickel-cadmium/ Lead P/N.	16 Oct 20
3	Addition of lines 216 – 230 Main & Emergency aircraft batteries Nickel-cadmium/ Lead P/N	03 Nov 20
4	Addition of lines 231 - 235 Main & Emergency aircraft batteries Nickel-cadmium P/N. Amendments to 214 & 227	24 Nov 20

2. INTRODUCTION

The purpose of this document is to detail the components for which 25 Repair Centre Limited has the capability to perform repair and overhaul activities and thereby defines the scope of approval granted to the company by competent authority under EASA Part 145.

Components itemised at Appendix C are complete assemblies, however, the individual piece parts and sub-assemblies of these are also considered to be covered by the entry in the list of the complete assembly.

3. RELATED DOCUMENTS

- a. Doc Ref: 25/MOE/02 – Maintenance Organisation Exposition
- b. Doc Ref: 25/MPM/01 – Maintenance Procedures Manual

4. RESPONSIBILITIES

4.1 Compliance Monitoring Manager

The Compliance Monitoring Manager is responsible for the following:

- a. Ensuring that this document is maintained in accordance with the requirements specified by the competent authority.
- b. Incorporation of all amendments to this document.
- c. Verification of the company's capability to Repair/Overhaul a component prior to submission for additional capability.
- d. Authorisation, on behalf of the company, of the submission to the competent authority or additions to the Capability List.
- e. Validation of the ratings specified in the company's scope of approval.

4.2 Operations Manager

The Operations Manager is responsible for the following:

- a. Ensuring that the company maintains the capability for all the components detailed in the Capability List.
- b. Identifying to the Compliance Monitoring Manager any required changes to the Capability List.

- c. Initial verification of the company's capability to Repair/Overhaul a component prior to submission for additional capability.

5. DOCUMENT MAINTENANCE

5.1 Requirements for Additions

The company will not undertake the Repair or Overhaul of any component unless that component is detailed in the Capability List.

Prior to submission to the competent authority for additional capability the company will ensure that the following are available:

- a. Relevant technical data, such as Component Maintenance Manuals etc., issued through the appropriate control systems.
- b. Sufficient qualified personnel capable of performing the maintenance activities on the subject components.
- c. All the tools, materials and test equipment as required by the relevant technical data.
- d. Suitable facilities, e.g. benches, plant and machinery, etc. are available and fully serviceable.

If the additional component is not covered by the ratings within the company's scope of approval from the competent authority, then a request for the relevant rating to be added will be made as part of the submission for additional capability.

Any such request is to be initiated using company form Q016 (copy at Appendix A) submitted to the Compliance Monitoring Manager by email.

5.2 Incorporation of Amendments

Once the requirements of para 4.1 have been met, form Q016 (Appendix A) will be completed. Form Q016 will contain a sequential number, which will be recorded in the History Details against each re-issue of this capability list. These changes will be formally submitted to the competent authority.

Notification to the competent authority of a change to the capability list will be by submission of Form Q016.

Acceptance of Form Q016 by the competent authority may be by email, fax or post and will be incorporated as temporary change until the next reissue of the Capability List. Acceptance by the competent authority is considered to be authority to perform the Repair or Overhaul and release to service of the additional components.

Details of the changes along with copies of completed forms Q016 will be retained as history within the Quality Department. All amendments to 25 Repair Centre

Limited Capability List will be incorporated at the 6-monthly document/ Quality System review.

A register of forms Q016 that have been raised will be maintained by the Quality Department. The register is Form Q016a. A copy of the current register is to accompany each form Q016 submission to the authority.

6 25 Repair Centre Limited Authority

All 25 Repair Centre Limited personnel are to be familiar with the requirements of the Capability List and are required to comply with the procedure for amendment of the list.

Signed

Karen Greene – Accountable Manager

Date: 24 November 2020

39	AIRCRFAT BATTERY SHOP	BATTERIES	November 2020

B.2. EASA Form 1 Block 11 Capabilities

The 'Capability' column in Table 2 states the level of work that 25 Repair Centre is competent to undertake. The following defines the limits of that work.

B.2a Overhaul (O/H)

In the list, the term 'overhaul' has the same meaning as that defined in in Appendix II to Part-M. Overhaul is a process that ensures the item is in complete conformity with all the applicable service tolerances specified in the type certificate holder, or equipment manufacturer's instructions for continued airworthiness, or in the data which is approved or accepted by the Authority. The item will be at least disassembled, cleaned, inspected, repaired as necessary, reassembled and tested in accordance with the above specified data.

B.2b Repaired (Rep)

Where 'repair' is stated, this is a process of rectification of defect(s) using an applicable standard. In this case, an applicable standard means a manufacturing/ design/ maintenance/ quality standard, method, technique or practice approved by or acceptable to the Competent Authority. The applicable standard shall be described in block 12 of the EASA Form 1.

B.2c Inspected/Tested (Insp/Test)

Where 'Inspected/Tested ' is stated this is a process of examination, measurement, etc. in accordance with an applicable standard (e.g. visual inspection, functional testing, bench testing etc.). In this case, an applicable standard means a manufacturing/ design/ maintenance/ quality standard, method, technique or practice approved by or acceptable to the Competent Authority. The applicable standard shall be described in block 12 of the EASA Form 1.

B.2d Refurbished

Where 'refurbished' is stated, this is an overhaul process which also includes re-finishing (painting) where necessary to restore the product to the original visual appearance (or as specified by the customer) using material specified by the OEM or in accordance with an approved repair/modification scheme. Where a product has been refurbished, the specification of coatings/paint will be stated in block 12 of the EASA Form 1.

B.3 Notes

- a. To reduce the size of the capability list whilst retaining the comprehensiveness, part numbers for products of one OEM where there is a range of variants of a model, have been grouped into 'series' based on common characters.
- b. Where the word 'Series' is used, it refers an item with a part number of which the characters preceding the word 'series' forms a prefix. For instance, "12345 Series" refers to all products with a part number beginning 12345. Where part number series contain suffixes with a variety of characters, the lower-case letter "x" is used. For instance, seats with part numbers 12345-101; 12345-102; 12345-103

are included in "12345 – xxx Series", where 'xxx' refers to any combination of letters or numbers that the OEM uses as a model variant.

- c. Where parenthesis '(')' are used, this indicates that the character is not applicable to all part numbers in that series. For instance, "12345-xxx-(x) Series" would include 12345-101, 12345-102 and 12345-102-A.
- d. Where a part number has a "/" included this indicates that part numbers differ only in the character before and after the "/". For instance, "41352001/2" refers to part numbers 4135001 and 4135002.
- e. The classification heading is a general grouping description to allow the reader to quickly search for a particular part number.

Signed:

Date: 24th November 2020

Karen Greene Accountable Manager

For and on behalf of 25 REPAIR CENTRE LTD.
